IPsec VPN Security Assessment Report

Parameter	Value
Job ID	job_362648fa
Assessment Status	COMPLETED
Risk Score	55.00 / 100
Risk Level	HIGH
AI Confidence	94.00%
Heuristic / AI Agreement	Yes

1. Executive Summary

CryptoLens assessed the supplied IPsec traffic with an overall security score of **55.00/100**, classified as **HIGH**. The assessment combines protocol evidence, configured scoring rules, and the analyzer outputs available for this job.

4 finding(s) were generated during the assessment.

2. Control-Plane Assessment

Parameter	Value
IKE Version	IKEv2
Operating Mode	Tunnel
Encryption Algorithm	AES-128-CBC
Integrity Algorithm	HMAC-SHA256
DH Group	14
PFS	Disabled
Key Lifetime (seconds)	28800
Replay Protection	Enabled

3. Score Breakdown

Category	Score	Maximum	Utilization
Encryption	15.00	25.00	60.0%
Integrity	15.00	15.00	100.0%

Category	Score	Maximum	Utilization
Key Exchange	0.00	15.00	0.0%
PFS	0.00	10.00	0.0%
Replay Protection	0.00	10.00	0.0%
Key Lifetime	10.00	10.00	100.0%
IKE Version	10.00	10.00	100.0%
Operating Mode	5.00	5.00	100.0%

4. Security Findings

Finding ID	Severity	Category	Observed Value
ENC_001	MEDIUM	Encryption	AES-128-CBC
UNKNOWN_KEY_EXCHANGE	INFO	Key Exchange	14
UNKNOWN_PFS	INFO	Pfs	false
UNKNOWN_REPLAY_PROTECTION	INFO	Replay Protection	true

1. Suboptimal Encryption Cipher

Description: AES-128-CBC is acceptable but AES-GCM is recommended for modern deployments.

Source: compliance_map.yaml

2. Unrecognized key_exchange parameter

Description: The observed parameter '14' is not present in the current compliance map. No security weakness is assumed; manual review is recommended.

Source: compliance_map.yaml

3. Unrecognized pfs parameter

Description: The observed parameter 'false' is not present in the current compliance map. No security weakness is assumed; manual review is recommended.

Source: compliance_map.yaml

4. Unrecognized replay_protection parameter

Description: The observed parameter 'true' is not present in the current compliance map. No security weakness is assumed; manual review is recommended.

Source: compliance_map.yaml

5. Traffic Analysis

Heuristic prediction: Tunnel

AI prediction: Tunnel

Traffic Type	Percentage	Packets	Avg. Packet Size (bytes)
VoIP	72.40%	1240	160.00
